

## PROCUREMENT POLICY

The commitment of Alpiq Energía España S.A.U. (hereinafter Alpiq or the company) with respect to responsible management in procurement and contracting of goods and services is set out in the following principles:

- The selection of suppliers will be governed by criteria of transparency and objectivity, seeking a compromise between the quality of the product/service, the best economic conditions. Likewise, SSL and environmental requirements will be taken into consideration.
- Alpiq's Management System will include specific procedures and instructions that will regulate the methodology of the Company's procurement process, ensuring equal treatment of suppliers, and including the supplier approval process, as well as the evaluation of supplier performance.
- All procurement decisions shall be made in accordance with the Management System and shall be duly recorded and accessible in the event of review by third parties and the Company itself.
- It will be an inexcusable condition for any supplier dealing with Alpiq to declare their knowledge of and compliance with the principles set out in Alpiq's Code of Conduct, as well as any applicable regulations.
- Resources shall be used sustainably, respectfully and efficiently.

This policy has been approved by Alpiq's Management Committee on 20/06/2023.
